# WiSE 系統層級模擬器

*Wireless Simulator Evolution*

工研院資通所

王竣彥

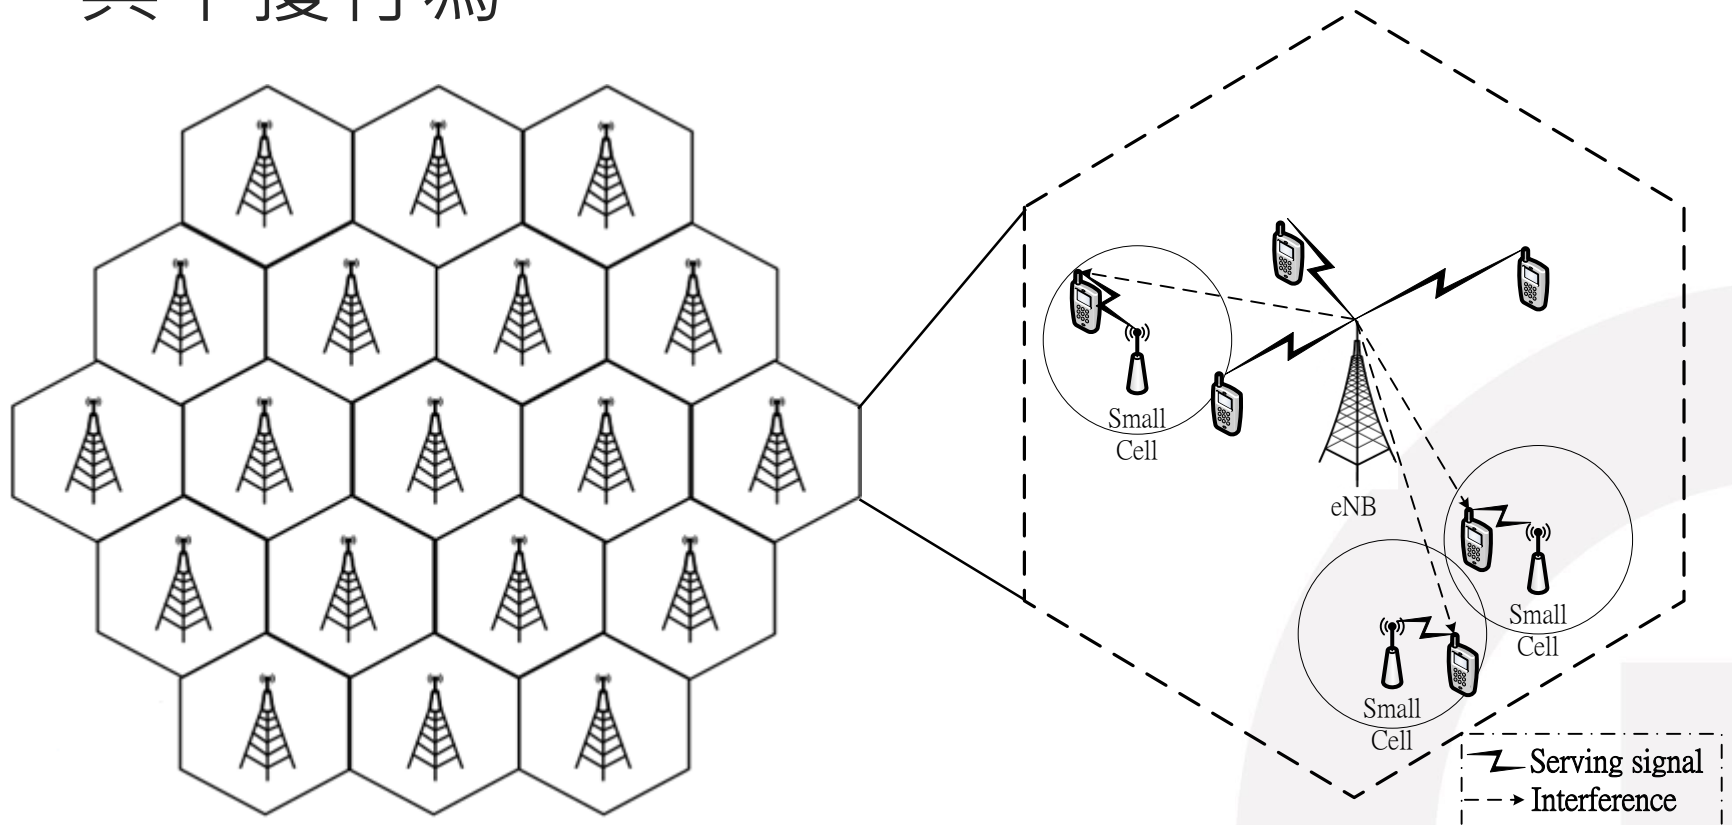

2016.03.28

# Outline

- 何謂系統層級模擬器?
- WiSE 模擬器功能介紹
- The **FACT** of WiSE
- 總結

# 系統層級模擬器 – What?

- 系統層級模擬器模擬大量基站與更大量的使用者設備之間錯綜複雜的排程、互動、傳送與干擾行為。

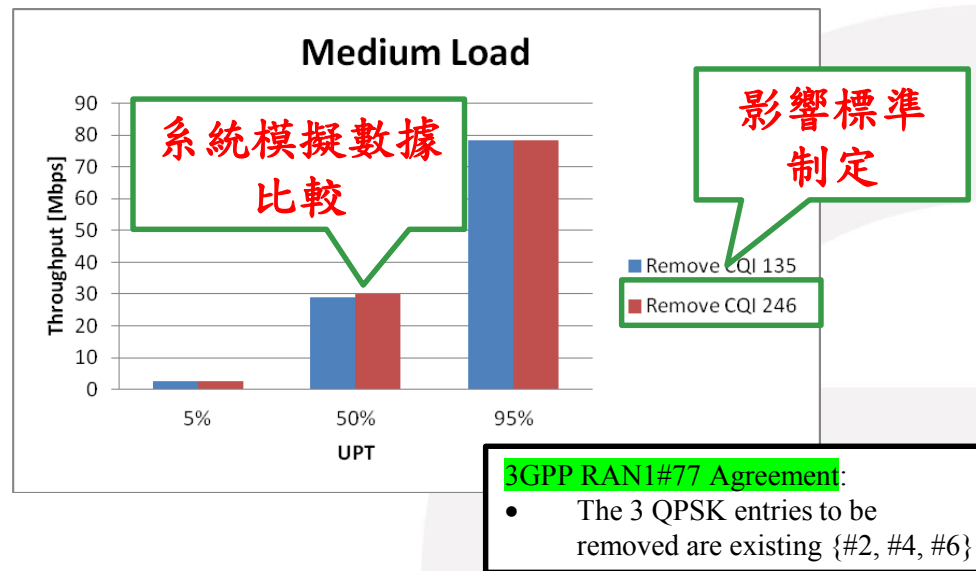

# 系統層級模擬器 – Need

## ● 需求

- 研究通訊技術在整體網路上的效果
- 協助產品開發
- 影響標準制定方向
- 提供客戶效能佐證數據

|                                 |                         |
|---------------------------------|-------------------------|
| <b>3GPP RAN1<br/>Study Item</b> | TDD eIMTA 干擾管<br>理及流量適應 |
| 總提案數                            | 126                     |
| 具模擬數據的<br>提案數                   | 95                      |

# 系統層級模擬器 – Why not? (1/2)

☹️ 傳統線路級模擬器僅模擬單一收送設備間的傳送行為，無法了解干擾影響。

# 系統層級模擬器 – Why not? (2/2)

- ☹️ 訊號覆蓋工具僅可獲得概要的訊號強度，無法了解流量影響、使用者封包吞吐量大、延遲、公平性等數據。

# 系統層級模擬器 – Objective

- ✓ 系統層級模擬器模擬大量基站與更大量的使用者設備之間錯綜複雜的排程、互動、傳送與干擾行為。
  - 可了解無線網路系統下大量的基站與大量的使用者設備在各種技術下，基地台的平均傳輸速率、流量影響、使用者封包吞吐量、延遲、公平性等數據。

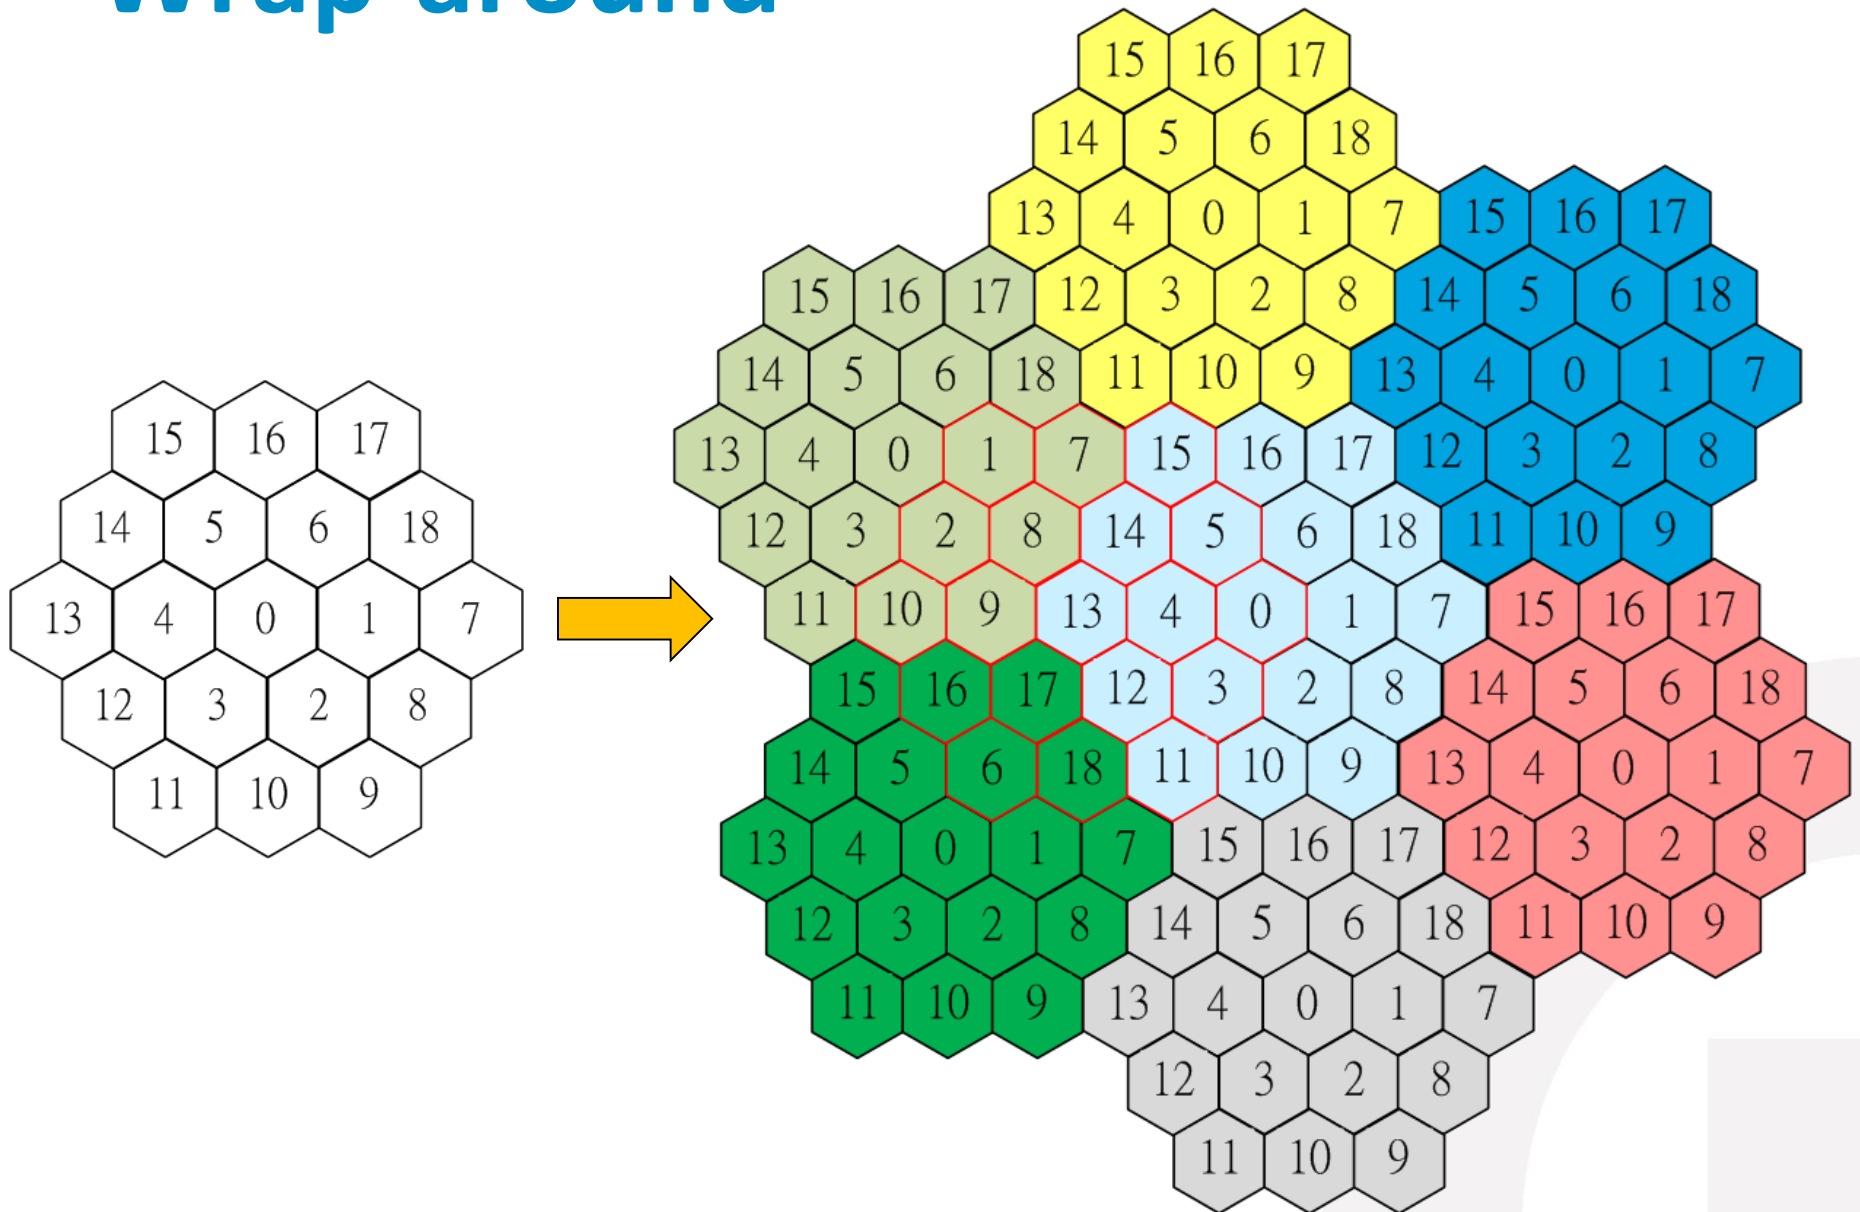

# WiSE 功能介紹

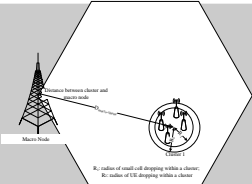

# WiSE 系統層級模擬器 – 特點

- 軟體需求: 只需要C++ compiler (GCC)
- 可模擬 LTE FDD system 與 LTE TDD system
- 具模擬 downlink 與 uplink 功能
- 根據closed-loop CSI feedback的結果進行排程 (e.g., Proportional fair, FIFO, and round-robin)
- Adaptive transmission mode based on channel capacity

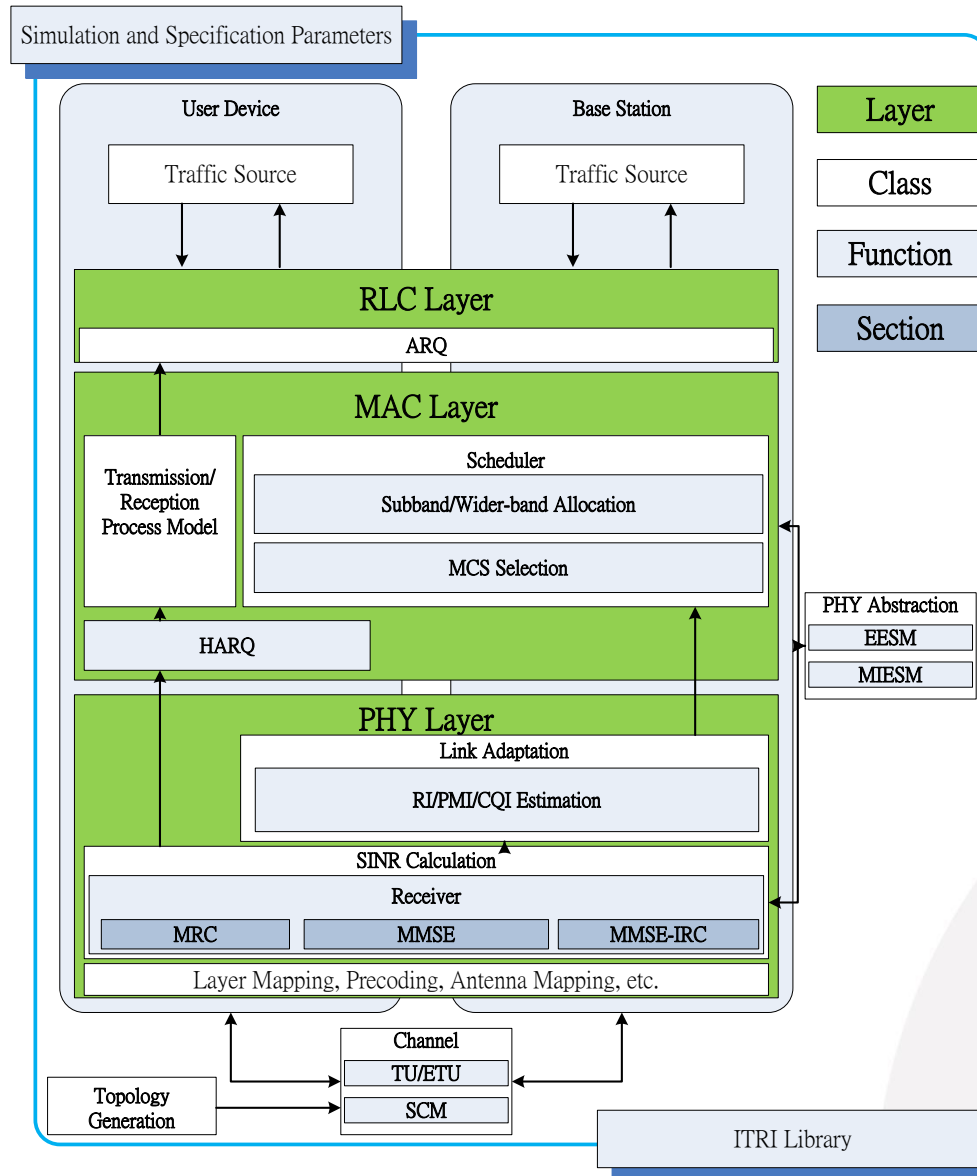

# Wrap-around

# WiSE 系統層級模擬器 – How? (1/2)

|   | Macro cell  | Small cell   |
|---|---|--|
| Layout                                      | Hexagonal grid, 3 sectors per site, case 1<br>Both 19 Macro sites and 7 Macro sites can be used. Companies should indicate whether 19 or 7 sites are used when presenting the results.              |  <p>Clusters uniformly random within macro geographical area; small cells uniformly random dropping within cluster area</p> |
| System bandwidth per carrier                | 10MHz   | 10MHz  |
| Carrier frequency                           | 2.0GHz  | 2.0GHz   |
| Carrier number                              | 1   | 1  |
| Total BS TX power (Ptotal per carrier)      | 46dBm   | 30 dBm, Optional: 24dBm, 37dBm   |
| Distance-dependent path loss                | ITU UMa [referring to Table B.1.2.1-1 in TR36.814], with 3D distance between an eNB and a UE applied. Working assumption is that 3D distance is also used for:<br>break point distance              | ITU Umi [referring to Table B.1.2.1-1 in TR36.814] with 3D distance between an eNB and a UE applied<br>Working assumption is that 3D distance is also used for:<br>break point distance                        |
| Penetration                                 | For outdoor UEs: 0dB<br>For indoor UEs: 20dB+0.5din (din : independent uniform random value between [ 0, min(25,d) ] for each link)   | For outdoor UEs: 0dB<br>For indoor UEs: 20dB+0.5din (din : independent uniform random value between [ 0, min(25,UE-to-eNB distance) ] for each link)   |
| Shadowing                                   | ITU UMa according to Table A.1-1 of 36.819<br>Working assumption is that 3D distance is used for shadowing correlation distance   | ITU UMi [referring to Table B.1.2.1-4 in TR36.814]<br>Working assumption is that 3D distance is used for shadowing correlation distance  |
| Antenna pattern                             | 3D, referring to TR36.819   | 2D Omni-directional is baseline; directional antenna is not precluded  |
| Antenna Height:                             | 25m   | 10m  |
| UE antenna Height                           | 1.5m  |  |
| Antenna gain + connector loss               | 17 dBi  | 5 dBi  |
| Antenna gain of UE                          | 0 dBi   |  |
| Fast fading channel between eNB and UE      | ITU UMa according to Table A.1-1 of 36.819  | ITU Umi  |
| Antenna configuration                       | 2Tx2Rx in DL, Cross-polarized   |  |
| Number of small cells per cluster           | 4, 10   |  |
| Number of small cells per Macro cell        | [4,10]*Number of clusters per macro cell geographical area  |  |
| Number of UEs                               | 60 UEs per macro cell geographical area are recommended when FTP model 3 is used  |  |
| UE dropping                                 | Baseline: 2/3 UEs randomly and uniformly dropped within the clusters, 1/3 UEs randomly and uniformly dropped throughout the macro geographical area.<br>20% UEs are outdoor and 80% UEs are indoor. |  |
| Radius for small cell dropping in a cluster | 50m   |  |
| Radius for UE dropping in a cluster         | 70m   |  |
| Minimum distance (2D distance)              | Small cell-small cell: 20m<br>Small cell-UE: 5m<br>Macro –small cell cluster center: 105m<br>Macro – UE : 35m<br>cluster center-cluster center: 2*Radius for small cell dropping in a cluster       |  |
| Traffic model                               | FTP1 or FTP3  |  |
| UE receiver                                 | MMSE-IRC as baseline  |  |
| UE noise figure                             | 9dB   |  |
| UE speed                                    | 3km/h   |  |
| Cell selection criteria                     | Baseline: RSRP for intra-frequency and RSRQ for inter-frequency, with cell common bias if CRE is applied.   |  |

# WiSE 系統層級模擬器 – How? (2/2)

# PHY Abstraction

- 透過線路級模擬(Link Level Simulation)與實體層抽象技術(PHY Abstraction)計算錯誤率。

# 圖形化使用介面

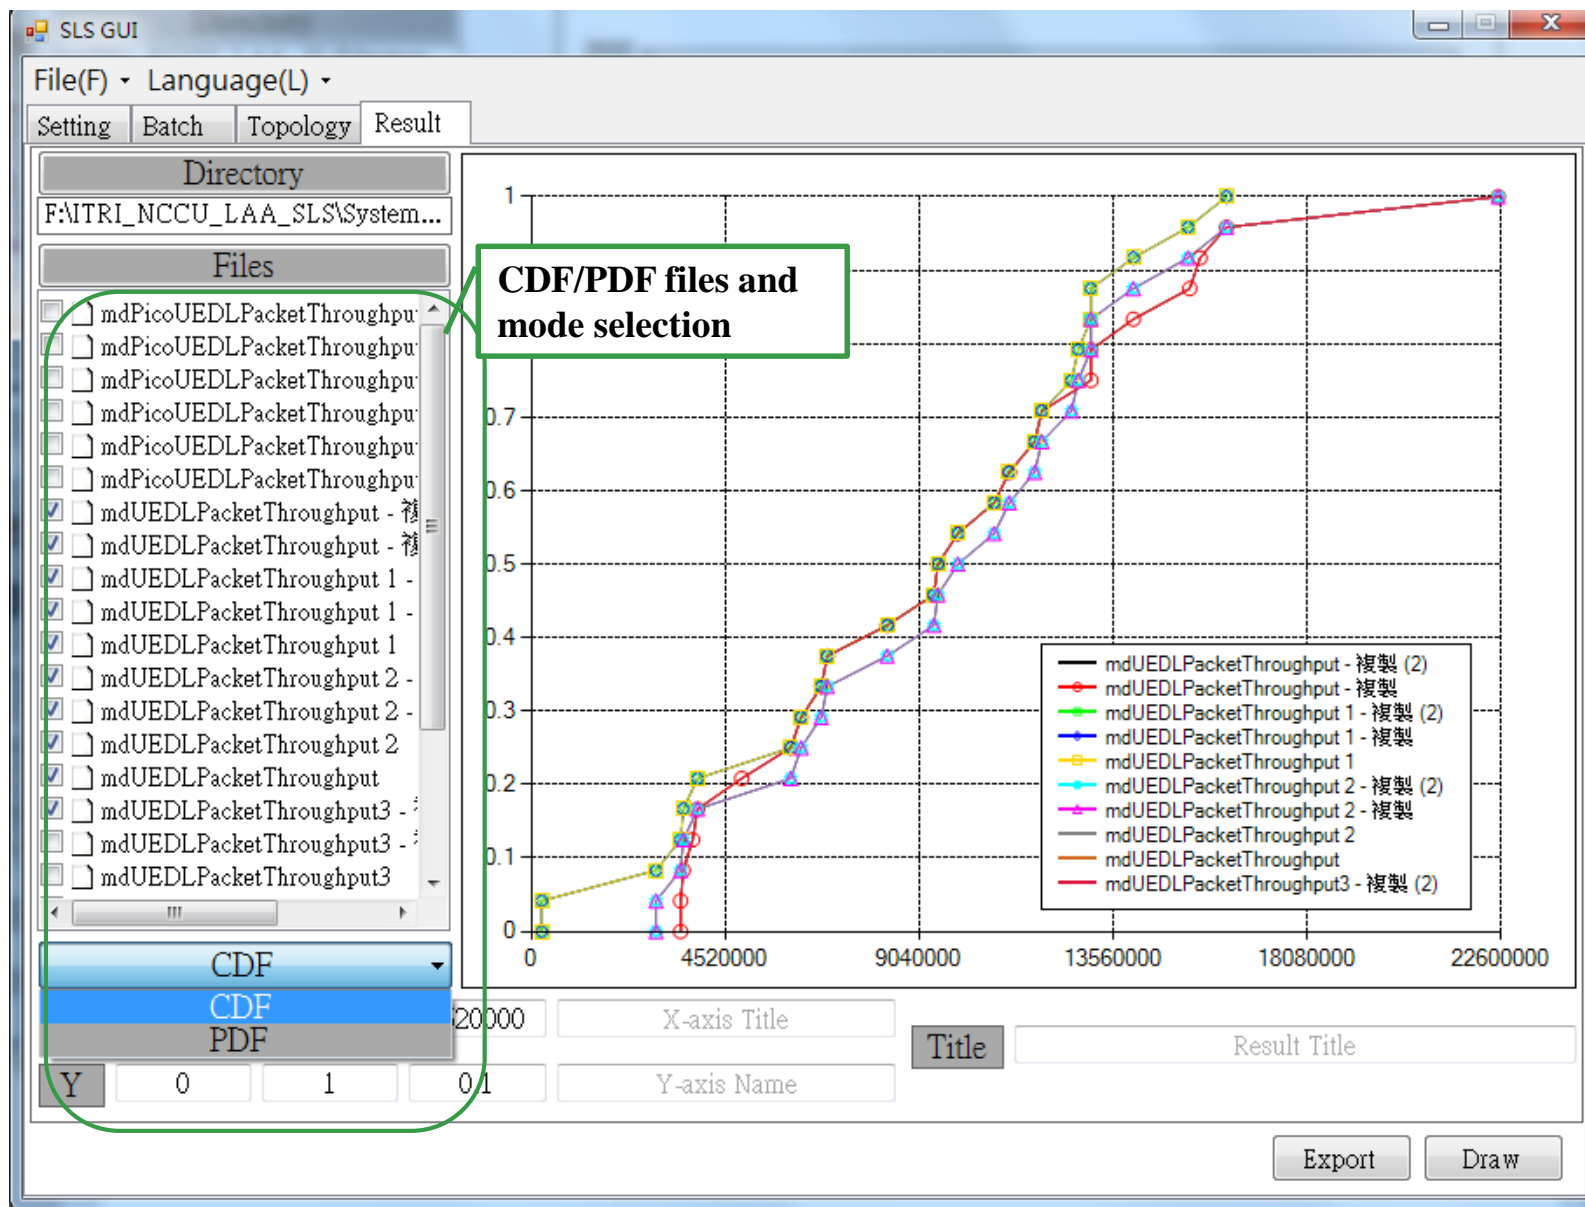

# 圖形化使用介面 – Topology

The screenshot displays the SLS GUI interface for network topology visualization. The main window contains a menu bar (File(F), Language(L)), a tabbed interface (Setting, Batch, Topology, Result), and a directory path (F:\ITRI\_NCCU\_LAA\_SLS\System...). The 'Files' list includes:  mdCellLocation,  mdNodeLocation,  mdUEAvgSINR,  mdUECellAssignment, and  mdUELocation. A 'Zooming' control panel shows a zoom level of 1 with '+' and '-' buttons. The central plot area, labeled 'Topology files', shows a hexagonal grid of cells with various colored nodes and triangles. The X and Y axes are labeled 'X and Y axis configuration' with values ranging from 0 to 2800. At the bottom, there are input fields for X-axis (0, 2800, 280), Y-axis (0, 2500, 250), and Result Title, along with 'Export' and 'Draw' buttons.

| Axis | Min | Max  | Step | Title        |
|------|-----|------|------|--------------|
| X    | 0   | 2800 | 280  | X-axis Title |
| Y    | 0   | 2500 | 250  | Y-axis Title |

| Field | Value        |
|-------|--------------|
| Title | Result Title |

# 線上函式庫查詢

The screenshot shows a web browser window with the URL `wireless.itri.org.tw/waux/WiSE/WiSE_Library_Doc_html/annotated.html`. The page header includes the ITRI logo and the text "工業技術研究院 Industrial Technology Research Institute ITRI WiSE 1.0.0". A navigation menu contains "Main Page", "Namespaces", "Classes", and "Files". The "Classes" menu is active, and a sub-menu shows "Class List", "Class Index", and "Class Members".

The main content area is titled "Class List" and contains the text: "Here are the classes, structs, unions and interfaces with brief descriptions:". Below this is a table listing various classes and their descriptions.

|   |   |
|---|---|
| <a href="#">C80216mShadowFading</a>       | C802.16m Shadow Fading Generation class   |
| <a href="#">CCell</a>                     | Cell class which transmit/retransmit packets to serving UEs and calculate performance |
| <a href="#">CChannel</a>                  | Channel class   |
| <a href="#">CNetwork</a>                  | Entire network class  |
| <a href="#">CNetworkTopologyGenerator</a> | Network topology generator  |
| <a href="#">CNode</a>                     | Normal Node class   |
| <a href="#">Complex</a>                   | <b>Complex</b> number class   |
| <a href="#">COnlineChannelGenerator</a>   | Channel class   |
| <a href="#">CPacket</a>                   | Packet  |
| <a href="#">CPacketGenerator</a>          | Packet generator  |
| <a href="#">CPHYAbstraction</a>           | PHY abstraction   |
| <a href="#">CQueue</a>                    | Queue class is based on STL:vector (array type) with some required functions for SLS  |
| <a href="#">CScheduler</a>                | Scheduler   |
| <a href="#">CSINRcalculator</a>           | SINRcalculator class  |
| <a href="#">CSLSTool</a>                  | SLS tool functions  |
| <a href="#">CSpec</a>                     | Store and load the Spec arguments   |
| <a href="#">CTemplateMatrix</a>           | Template matrix used by <a href="#">C80216mShadowFading</a>                           |

# 實體與線上訓練課程

The screenshot shows the website of the Taiwan Association of Information and Communication Standards (TAICS). The browser address bar shows the URL: [www.taics.org.tw/index.php/events/show/id/e444c211381c1034a9b5343980d8bc23](http://www.taics.org.tw/index.php/events/show/id/e444c211381c1034a9b5343980d8bc23). The logo, which consists of a colorful circular emblem and the text '台灣資通產業標準協會' and 'Taiwan Association of Information and Communication Standards', is highlighted with a red rectangular box. The navigation menu includes '首頁', '網站導覽', 'FAQ', '聯絡我們', and 'English'. The main content area features a blue header with the breadcrumb '首頁 > 新訊與活動 > 活動資訊'. Below this, there are two columns: '新訊與活動' on the left with sub-links for '產業新訊', '活動資訊', and '協會公告'; and '活動資訊' on the right. The right column displays details for an event titled '4G/5G系統層級模擬器說明會', including its date (2016-03-10), source (TAICS), and social media icons for Facebook, Twitter, Google+, and Email. A table below provides further details about the event.

|      |   |
|------|---|
| 活動日期 | 105年3月 28日 ( 星期一 ) 9:30am~11:30am       |
| 活動地點 | 永豐餘大樓TAICS台北辦公室第一會議室 (台北市重慶南路二段51號8樓之1) |
| 主辦單位 | 工業技術研究院                                 |
| 聯絡窗口 | 鄭雅坪小姐 ; Email: yaping@itri.org.tw       |
| 報名人數 | 50                                      |
| 報名起迄 | 2016-03-11 ~ 2016-03-25                 |
| 活動費用 | 免費                                      |
| 報名狀態 | 已額滿                                     |
